# Stormwater Management

## FOR EASTERN WASHINGTON

---

In June 2001 a chartering meeting was held to begin development of a stormwater management process tailored to the unique realities of Eastern Washington. Since June, an Eastern Washington Stormwater Steering Committee was formed, a stormwater consultant team was hired, and a scope-of-work and schedule have been prepared for developing:

- A Stormwater Manual for Eastern Washington, and
- An Eastern Washington Phase II Model Municipal Stormwater Program.

A stakeholder workshop will be held on November 29, 2001 to begin development of these documents. You should attend if you attended the June 2001 chartering meeting, if you or your organization is responsible for stormwater management in your community, or if you are interested in developing stormwater guidelines and regulations.

Information on the project and process will be presented in the morning. In the afternoon, participants will be invited to join the Stormwater Manual Subcommittee or the Stormwater Model Program Subcommittee to begin the program and document development.

Please bring any materials you currently use for stormwater design (e.g., rainfall information, drainage requirements, ordinances, etc.) that may be beneficial for the consultants to consider as the documents are developed.

If you have questions call Ross Dunfee, Steering Committee Chair at (509) 786-5611, or Tony Barrett, Ecology Project Manager at (360) 407-6467.

## Stakeholder Workshop

**Thursday  
November 29, 2001  
9:00 a.m. to 3:30 p.m.**

**Moses Lake Convention Center  
1475 Nelson Road N. E.  
Moses Lake, WA 98837  
(509) 766-1416**

*From I-90 take Exit 179, head north onto Hwy 17, stay in right lane, at stop light turn right onto Nelson Road N. E., after 1/8 mile turn right into Winstation Complex and parking lot.*

Be sure to attend this stakeholder workshop to:

- ♥ # Learn about the stormwater manual and model program development process.
- ♥ # Understand the requirements of the upcoming Stormwater NPDES Phase II regulations.
- ♥ # Learn about the structure of the Eastern Washington Stormwater Steering Committee and project Subcommittees.
- ♥ # Participate in the stormwater manual or model stormwater program subcommittee.
